

Pricelist High Precision Laser Target Shooting, Hardware & Software

Die Jagd / The Hunt

Details:

- Hunting close to reality with new HDTV capable video simulator
- 3 different shooting modes,
- Simple adding of own/private videos with current formats into playlist
- Excellent rendering quality up to HDTV,
- 60 videos from European and African wild animals are embedded
- Shuffle & endless play

\$780.00

Die Neue Jagd mit Schussauswertung / The New Hunt with shot placement analysis

Details:

General features equal to the 'Die Jagd' software. Real nature video footage showing real-life party hunting scenes to train shot placement onto moving game animals. This newly developed software introduces an editor to illustrate and edit hit-zones on game animals for mortal, non-mortal as well as 'avoid-area' shot placement. This enables an analysis and scoring of the shot placement while using real-life video scenes. Use this for competition or to asses your own marksmanship.

High-precision camera Gamma 30 USB

The revolution of precision engineering, industrial high precision, high-resolution camera with high precision measurement sensor. Full automatic calibration. 21 million sample points/sec. Up-to 75 fps. Incl. driver for Win XP, Win 7 utilizing a standard USB port. The best available equipment for laser shooting systems on the market. In combination with a modern PC better than the FireWire version!

\$1,700.00

High-precision camera Gamma 30

FireWire industrial camera with full-automatic calibration. 130 measured points with PC and beamer! In contrast to USB Firewire technology enables for a faster and more reliable data transfer (no need for Port-Sharing like with USB) and therefore it ensures for best precision in shot point and hit point analysis.

\$1,270.00

Not required

Zoom objective

Screw-on zoom objective for your Gamma 30 camera for an optimal adjustment of the camera on your sideboard and therefore optimization of hit precision! Better protection against ambient light and disturbing IR radiation. Full usage of sensor surface in each position.

\$85.00

Laser pointer set and trigger switch

Insert the laser pointer into muzzle (various calibers available, rifle, handguns, shotguns) and connect via a cable with the trigger switch. A laser impulse is generated every time you pull the trigger (no need to operate the action or reload). The function of the action is still available to pretend real hunting situation!

Combo set rifle + shotgun + switch
\$710.00

Rifle laser
\$230.00

Shotgun laser
\$205.00

Combo rifle laser + switch
\$490.00

Switch only
\$280.00

Niederwild-Jagd / Small Game Hunting

Details:

Go for rabbits, pheasants and foxes in 3 different areas. Real-life 3D graphics, many options, dual screen.
Languages: German/English/Russian

Available Options:

Animal speed, animal size, shot pattern size, reloading on/off, recoil on/off, aim ahead on/off, game mode fun/competition

\$255.00

Details:

An exciting drive hunting in 3 different areas. Excellent 3D graphics with extreme realistic animal movement. Extra application modus with exportable result list in Excel. Dual screen capability.

Languages: German/English/Russian

Available Options:

Speed of wild boar, size of wild boar, short break for hit scoring, reload on/off, recoil on/off, aim ahead on/off, game mode fun/competition

\$255.00

Hit the cans. 125 challenge levels. High-score system and bonus points. Appropriate for kid shooting.

\$170.00

More software titles available, like double trap and skeet as well as African Safari and Dangerous Game hunt. We can provide as well overhead projectors and/or projection screens of various sizes. Or we provide consulting and you obtain this equipment from your favorite vendor.

*) All prices include Canadian HST of 13%, free shipping within Canada for orders above \$500.00.
